Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Why would you even consider giving corporations precedence over the citizen user?

Sincerely,  
Kathleen Mosher

Sep 10, 2014

Petition Mailbox  
DC 20036

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

Gentleperson,

Do you remember the days of dial-up Internet connections? I sure do. It took forever to download content from websites. But now the Internet is much quicker. Through my current provider - Charter - I can download content at over 110 Mbps.

I access a lot of websites, some of them run by people who are not rich. But I like to get a lot of information from various sources quickly. Not at the old dial-up speeds, or at speeds of the old AT&T DSL speeds of less than 20 Mbps.

Speed of downloads should not be dependent on the money that Internet providers can gain from websites. The Internet should be a superhighway for all. If anything, download speeds should be even faster than they are today.

Do not make the Internet a system of fast roads for big players, and slow roads for those who can't afford to pay big money to the already rich Internet providers. You should be protecting the Internet for all (websites and users), not just for the big companies that can afford to pay for faster roads.

Sincerely,  
Mr. John Hilgeman

DC 20036

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Ms. Lindsay Mugglestone

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Mrs. Harriet Ingram

Quit catering to big business and protect the taxpaying constituency. Quit being finger puppets for the rich and the elite. Have you forgotten the phrase "For the people, by the people and of the people" in the Constitution? Maybe you should reread it so you understand WHY you were elected! If you are not for the people then YOU are the problem.

Sincerely,  
Mr. Paul Groh

Dear Commissioner Wheeler,

The internet is the last public media domain. Radio, print, and television media outlets are all owned by a handful of companies. Americans can no rely on these media platforms to supply unbiased and complete information about politics and current events. The internet has connected the world in ways that no other media platform has before. Of course companies want to exploit it just like they have every other platform. However the internet is unique and it should remain the property of the people. If the US truly stands for equality and free speech than you should make sure that companies don't infringe on net neutrality.

DC 20036

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Mrs. Pamela Mccumbee

Subject: We Keep Begging the FCC to Protect Internet freedom!

Dear Commissioner Wheeler,

It's shameful and anti-democratic that the FCC is so eager to take away the Internet from average citizens who will no longer be able to get to the websites of their choice. This tier plan will pretty much halt innovation since the large corporations have no interest in developing the Internet for anything other than their own profit agenda.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

To whom it may concern at the FCC:

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

I am deeply troubled at the prospect of yet one more situation of major importance to the public where moneyed interests would be able to buy their way to dominance. The Internet must be open equally to all without any qualification from the FCC that could allow some to have superior access to others..

Sincerely,  
Geraldine Ostrove

Subject: The FCC must protect the US users of the Internet

Dear Commissioner Wheeler,

I live in a rural area. The phone line to my house is from the mid 1970s. The cable it connects to is from the 1960. My phone company keeps making me pay for "faster" service but it does not get faster due to the "last mile" (miles?) problem. There is no regulation of the Internet service by the New Mexico Utilities Commission. They can only address phone issues. Not Internet issues. If we loose net neutrality US citizens who are individuals will be left to have "left behind" service levels just as I have had left behind physical access.

It is a shame many countries provide better protection for their Internet users. I rely upon the FCC to regulate the Internet for the benefit of all citizens including the rural citizens.

If the FCC does not protect us who will?

Sincerely,  
Mr. Robert Lopez

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Mrs. Dena Hill

Subject: Protect INTERNET FREEDOM!!!

Dear Commissioner Wheeler,

As I am sure you recognize, the Internet is our 21st century public square. We use it to inform ourselves about a tremendous number of subjects that include candidates, issue debates, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is VITAL TO OUR DEMOCRACY!!!

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Mr. John Dart

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

It is clear that the push by corporations to create "fast lanes" for the large carriers/providers will then be paid for by the consumers. If the FCC approves this scheme, it will to the detriment of customers and to the US economy as well.

Sincerely,  
Mr. Keith Wauchope

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

When I was young, but old enough to be aware of my responsibilities towards others, my parents insisted that I always be prompt when others were expecting me. To be late (except in a real emergency), my parents said that whenever I was late, I was "telling" those who expected me that my time was more important than theirs, and thus I "called the shots." They saw such behavior as discourteous, rude, and arrogant. The same case can be made for allowing the "privileged few" to make me and others like me ":wait" for access to an Internet that chooses the wealthy and powerful over us plebians. In other words, my time is at the disposal of those whose interests are far more important than mine. This is NOT the way citizens in a true democracy behave! A free, open Internet works extremely well, and favors no one over another. Please: Keep it that way!

Sincerely,  
Dr. Barbara Burkett

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Michelle Marentette-Hermanutz

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

As a teacher, the need for an internet for everyone is a necessity! The students that I teach come from a poor urban setting and many times do not have the same opportunities. My students need to have a world view. They need an internet that is not being buffered only because SOME internet companies are successful! What is the sense in that? That would be like Best Buy only selling Apple products to a favored few, while everyone else got 20 year old flip phones. Keep the internet free flowing. Demand that the ISPs and the phone companies to come up with a better idea to serve everyone.

Sincerely,  
Mrs. Susan Swezeny

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Ms. LISA Hey

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The neutrality of the internet and its availability to the common man is the last remaining bastion of real democracy left in America that has not fallen to the oligarchs. It appears inevitable now that it, too, will fall, because the FCC and Chair Wheeler seem to be just another part of the same system that hands every good public service over to the wealthy. Is there nobody in our entire corrupt political system that is concerned about how our democracy has been damaged by the power of money? Surprise us all by doing the right thing. Do SOMETHING to demonstrate that the ordinary hard-working Americans who keep this country going deserve at least a tiny slice of the pie.

Sincerely,

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Mr. Richard Sackett

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

The FCC & federal regulators **MUST** reclassify broadband service as a public utility, which would allow for the requirement of net neutrality rules.

We want to reclassify ISPs as Title II common carriers. A common carrier is required to provide service in general terms and indiscriminately.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Mrs. Lorraine Grasso

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Already Comcast, Verizon, AT&T and other large communications companies are ripping off the public and using their size to generate concessions from government, and other businesses. It's not fair as it is, and giving them fast lane access will make it less so.

Sincerely,  
Mr. Kenneth Haar

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Ms. Lynn Glace

Subject: Everyone Should Get Equal Internet Power

Dear Commissioner Wheeler,

I ask you to fight for net neutrality. When people have power from their positions themselves, and have tons of money to spend; those things are rewards enough themselves.

Also if you end net neutrality, you'll give already to powerful C.E.O.s and Board of Directors members even more power to abuse.

Also ending net neutrality will take away from our democracy. The reason this is so is because then the superrich and super-powerful will have extra power with the internet, in addition to all the other extra powers they don't deserve.

Sincerely,  
Mr. Lawrence Rosin

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Mr. James Ofsink

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

Like Ben Franklin's Post Office when the Constitution was written, the Internet and its ability to distribute comprehensive information at relatively low cost is critical to the maintenance of the American democratic experiment. Little by little, particularly recently our democratic experiment is being eroded in favor of control by a small number of individuals with large pockets, either of their own or of the corporations that they control. Benito Mussolini's definition of Fascism was "the corporate state", or "the perfect marriage between corporations and the state". Any attempt to prioritize access to the Internet based on ability to pay merely hastens the demise of American democracy. Is that to be your legacy? I hope not. Please reclassify broadband as a utility.

Sincerely,  
Mr. Stephen Schuck

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely  
Kathy Spivak  
4515 Summer Ridge Court Road  
Mount Airy, MD 21771

Sincerely,  
Kathy Spivak

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,  
Ms. Barbara Graper
